## **NEW YORK STATE SUPERINTENDENT DEVELOPMENT PROGRAM**

# **PROUD TO BE A SPONSOR OF NYSAWA**

Perhaps never before has there been a greater need for highly prepared candidates for the superintendency. In these times of dramatic change, it is imperative that principals, directors and assistant superintendents who aspire to the position prepare themselves and step forward in the greater service of children in New York state.

The superintendency is a demanding position, one that requires a strong sense of ethical decision making and behavior, a belief that all children can be successful during and after formal schooling, and an ability to make critical decisions under pressure. The position demands the best leadership and deserves the best leaders.

The New York State Superintendent Development Program provides you with the opportunity to work, on a weekly basis, with outstanding, experienced superintendents whose careers reflect the strongest commitment to serving children, serving their school communities, and serving the next generation of school superintendents.

As New York State's longest running program for aspiring superintendents with a 12 year history and over 100 graduates who have entered the superintendency, we are proud of the heritage established by our successful graduates.

NYSSBA proudly congratulates NYSAWA on *20 years!*

Thanks for all you do in advancing gender equity and diversity  
in New York schools.

*Scholastic is the most trusted name in learning with a brand that is synonymous with quality. Scholastic's Education division provides research-based technology programs to support K-12 students. Grounded in the most current scientific research, Scholastic Education develops technology products and services that include intervention, instruction, assessment and data management and professional development.*

## A Comprehensive Reading Intervention Solution

**READ 180** is a research based intensive reading intervention program that helps educators confront the problem of special needs reading on multiple fronts, using technology, print, and professional development. The program directly addresses individual needs through differentiated instruction, adaptive and instructional software, high-interest literature, and direct instruction in reading, writing, and vocabulary skills.

**System 44** was designed for our *most* challenged, struggling readers in Grades 3–12. Many of these students are demotivated and disenfranchised from school as the result of years of academic failure. Intentionally metacognitive, *System 44* helps students understand that the English language is a finite system of 44 sounds and 26 letters that can be mastered. The program invites students to “crack the code” and join the community of readers, and provides educators with a comprehensive set of tools to meet this challenge:
